

**Vision
& Values**

“We established the Foundation as a family, out of compassion and a motivation for assisting those less fortunate. We wish to deliver lasting change alongside transparent and genuine partners, with the help of likeminded and benevolent supporters”

Our Story

The Just Living Foundation, established by the Walker Family in 2015, aims to support essential human needs and the rights of individuals and communities across the World.

Through financial and non-financial resources, the Foundation aims to deliver sustainable change to those who need it most.

Our grant scheme focuses on the areas of Clean Water, Food and Essential Medicine provision.

We hold the values of Compassion, Justice, Integrity, Sustainability and Impact central to all aspects of our support and operation.

Our support for Clean Water, Food and Essential Medicine is directed to:

- Individual people struggling to access the very basic needs and rights we support
- Small organisations facing difficulty in accessing funding
- Passionate people who are motivated to make a change and a lasting impact

We chose the three themes of Clean Water, Food and Essential Medicine as the focus of our grant programme, as they each represent a fundamental need and right for all humanity.

As a family, our background is firmly rooted in healthcare and medicine. We understand and appreciate the importance of supporting those suffering from illness or harm.

Clean water underpins healthcare. The Foundation hopes to support the creation and advancement of sanitation and water supplies in impoverished and developing areas.

Without food, we cannot live. The Just Living Foundation exists to ensure we provide all those we can with healthy, nutritious food to allow communities to thrive.

Our mission for the Just Living Foundation is to provide essential medicine to those suffering preventable and treatable diseases and or injury, across the geographical areas most in need.

We want to ensure the causes we support as well as the fund itself, are sustainable. We wish to create a lasting charitable trust, which will continue beyond our lifetimes.

Walker Family

The Just Living Foundation was set up to create a living fund, supporting causes we feel passionate about as a family, focusing on human needs and rights.

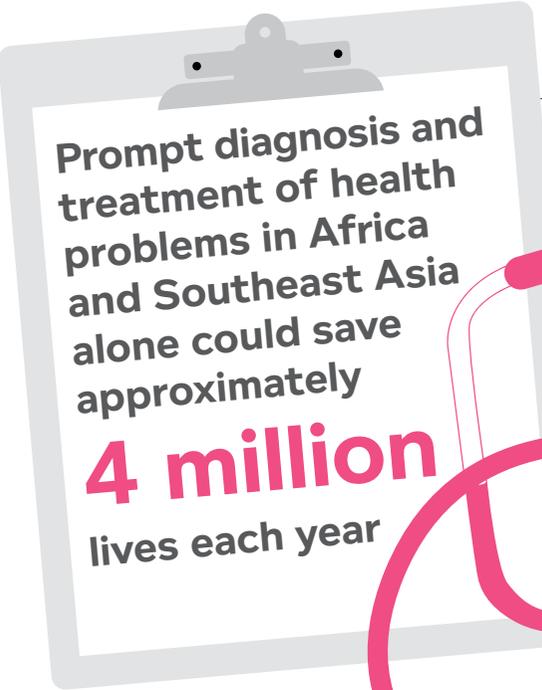

Impact and Sustainability are key motivators for our Foundation's giving strategy. We will support grassroot partners to achieve change in an effective and efficient way.

Stuart, along with his two sons, Julian and Mel were keen to use their expertise in business, organisation and ethics to support small charities to increase their impact for the communities they serve.

The Family are committed to engaging with partners personally as well as through financial support to maximise benefit and sustainability.

The Foundation began as a trust fund from the sale of Stuart's business. The foundation came about through the family's wish to increase their philanthropic activity in an ethical and sustainable way.

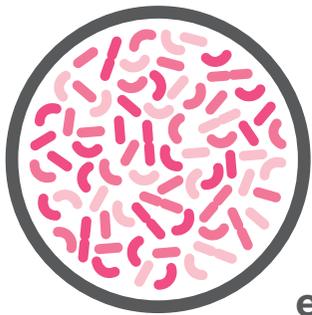

Research Highlights

Prompt diagnosis and treatment of health problems in Africa and Southeast Asia alone could save approximately

4 million lives each year

Source: DFID

Over 14 million people are killed by infectious diseases each year, 90% of which are in the developing world

Source: The Scholarly Commons

More than half a million children in the UK

are now living in families who are unable to provide a minimally acceptable diet

Source: Trussell Trust

10.9%
of the world's population are undernourished

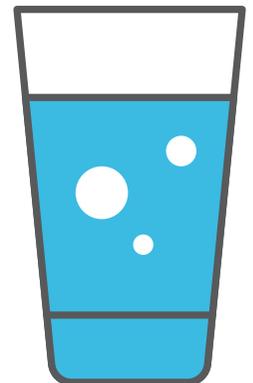

Source: Food and Agricultural Organisation.

By investing in clean water alone, young children around the world can gain more than

413m days of health

Source: The Water Project.

650 million people live without safe water

Clean Water

“2.3 billion people don’t have access to adequate sanitation, one in three of the world’s population”

WaterAid

Water Aid Songhor, Kenya

Three new rainwater catch tanks have been provided for the Early Child Development Centre in Songhor, a remote rural community in Kenya.

As a result of our support:

- Reliable safe drinking water will now be provided for the entire centre
- 170 children will benefit from a direct source of clean water
- Better sanitation and nutrition will reduce health problems

Community Health and Education, Nepal

This programme run by Operation Agri provides clean drinking water, sanitation and health awareness to families living in Bhalukude, Nepal.

As a result of our support:

- Over 500 families will benefit from a fresh water source
- Clean water and better sanitation will significantly reduce waterborne diseases
- This project is constructed by local people, ensuring employment and economic benefit to the community

Sanitation Project, World in Need, Uganda

We have funded a bore hole and sanitation provision to create safe drinking water and toilet facilities for three villages in Lira Provenice, Northern Uganda. As a result of our support:

- 800 people will receive sanitation facilities for the first time
 - Waterborne disease are expected to be eliminated within six months
-

Food

“Around 805 million people or one in nine, were suffering from chronic undernourishment in 2012-2014 – almost all of these people live in developing countries”

Food and Agricultural Organisation

Sustainable Agriculture Livelihood Innovation, Kenya

This project run by Christian Aid, works with farming groups in Kenya to improve the quality and quantity of their crops. As a result of our support:

- Farmers are trained in new technology to increase knowledge and provide a basic income
- Small-scale farmers are provided with long and short term weather forecasts allowing them to make informed decisions about what and when to plant
- This will provide a reliable source of food for communities in the region

Early Child Development Feeding Programme Songhor, Kenya

The Foundation funded a feeding programme for children who attend the Early Child Development centre at Songhor Upper Hills Academy.

- 170 children attend Upper Hills Academy
- 60 of the youngest children receive food provision throughout their studies
- It costs £1 per week to feed one child
- Since 2009 thousands of children have been provided with a meal

Boracay Feeding Programme, Philippines

Babies of Boracay was established to tackle various issues faced by the community. One of their objectives is providing food relief.

- 55 children and babies aged between six months and six years will benefit from the feeding programme
- Each child will receive two nourishing meals a day
- Educational toys are offered to children to encourage learning

Essential Medicine

**“10 million children
a year die from
preventable diseases
and conditions”**

DFID

Child and Adolescent Mental Health Support, Butabika, Uganda

The Child and Adolescent Mental Health Ward, Butabika, is the largest psychiatric hospital in Uganda. Our support was directed towards educational and recreational resources as well as medical equipment.

- Butabika is the largest and one of the only inpatient wards for children with mental illness
- Children in the ward have primarily been abused, abandoned, bereaved and stigmatised
- Often children have nowhere else to go and have families that are untraceable

Nalondo School & Corrective surgery Operations Project, Bungoma, Kenya

Nalondo school is home to 450 students aged between 4-18 years old, over 300 of the students have a disability. As a result of our support:

- 45 wheelchairs have been supplied
- 20 children have been fitted with prosthetic limbs
- 10 extra support workers have been trained to support the children

Primary Health Care Centre, Eastern Congo

Access to essential health services is one of the top priority issues in the Congo, contributing to increased mortality. The Primary Health Care Centre will improve access to health care services. As a result of our support:

- 80% of people in target areas will be covered by quality Primary Health Care services
 - The community will be strengthened by health education and valid health care information
 - Community nurses will be trained to diagnose and treat common diseases
-

Helping small organisations and individuals with **big** ideas

Furthering human needs and rights of individuals and communities across the world. Our support for Clean Water, Food and Essential Medicine is directed to:

- Individual people struggling to access the very basic needs and rights we support
- Small organisations facing difficulty in accessing funding
- Passionate people who are motivated to make a change and a lasting impact

The Foundation offers nonfinancial support, operational and strategic guidance for organisations aligned to the ethos of the Foundation.

Our support is driven by the values of Compassion, Justice, Integrity, Sustainability and Impact.

Support Us

100% of the donations we receive is directed to the partners we support.

If you would like to support the work of the Foundation, you may do so via our website, by cheque or by BACs payment.
